

## DURADORM RESTRAINT BED

The **DURADORM B/R** is a version of our standard DURADORM featuring three recesses per side that house a steel bar suitable for attaching restraint belts. While our DURAGUARD and ISOLATION bed designs are single purpose, the **DURADORM B/R** can be used as an everyday bed in a room or dormitory setting, allowing for the use of restraints when needed, without the need to move the client to a different location.

The bed is a molded fiberglass unit without seams, with a textured surface finish and recessed sides for added toe space. It is free standing and can be permanently anchored to the floor using an optional kit. It has a 33" wide by 76" long mattress platform and is available in any of our eight standard colors.
